DETAILED ACTION

Election/Restriction

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-47, drawn to "a tester for testing dice on a wafer...wherein the connections of the wafer probe card present an impedance selected to *emulate the characteristic impedance of an end-use environment...*"

Group II, claim(s) 48-84, drawn to "a tester for testing a device under test (DUT)...*utilizing Rambus Signaling Levels (RSL) or double data rate (DDR) communication over a synchronous dynamic memory bus...* such that the DUT can perform at least one of read and write operations targeting the memory device..."

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: *impedance emulation of an end-use environment* is considered a separate inventive concept from *RSL or DDR communication over a synchronous dynamic memory bus*.

3. A telephone call was not made to request an oral election to the above restriction requirement because the requirement is complex and/or the Examiner knows from past experience that an election will not be made by telephone. See MPEP 812.01.

Art Unit: 2857

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
